

MUHAMMAD SHARJEEL SALEEM
AUTOMATION ENGINEER

ACCESS CHECKLIST — YALE MIGRATION WORKFLOW AUTOMATION (MVP)

PREPARED FOR	Yale Migration and Education Consultants — Brisbane, Australia
PREPARED BY	Muhammad Sharjeel Saleem — Automation Engineer (independent consultant)
DATE	21 July 2026
REFERENCE	Engagement Letter dated 21 July 2026 (MVP — commenced)

Everything below is a share or an invite — you will never be asked to send a password. Everything stays under Yale Migration's own accounts, and you can revoke any access at any time. Items are in priority order: completing Priority 1 unlocks the first week of the build.

Priority 1 — Unlocks the build (this week)

☐ 1. Client Engagement Log (Google Sheets) — 1 minute

Open the sheet → Share → add sharry00010@gmail.com as Editor → Send.

Also reply with the sheet's link.

Also share (or point us to) your other tracking sheets if they are separate files — the Client Inquiry Log and the deadline-tracking sheet — or simply confirm they are tabs inside the same file.

☐ 2. Microsoft 365 / OneDrive — 10 minutes (admin needed)

Step 1. Go to admin.microsoft.com → Users → Active users → Add a user.

Step 2. Create a user named "Automation" (e.g. automation@yalemigration.com.au), and assign a licence that includes OneDrive and Power Automate. When creating the user, tick "Require this user to change their password when they first sign in" — that makes the temporary password harmless.

Step 3. Share the top-level client-folders location in OneDrive with that user (Edit permission). Also tell us which ONE existing client folder you consider a perfect example of how a client folder should look — we use it as the model.

Step 4. Send us the username by message and the temporary password by a DIFFERENT channel (e.g. username on WhatsApp, password by SMS or a call) — we change it immediately on first login and enable two-step verification.

Why a dedicated user: all automations run under an account YOU own — nothing is ever tied to a personal login, and you can disable it anytime.

☐ 3. Email inbox (project1@yalemigration.com.au) — 5 minutes

Step 1. First, turn on 2-Step Verification for this account: myaccount.google.com → Security → 2-Step Verification → follow the prompts.

Step 2. In Gmail: Settings (gear) → See all settings → Accounts → "Grant access to your account" → add sharry00010@gmail.com. Note: because this is an outside address, your Google Workspace admin may first need to allow it — in admin.google.com go to Apps → Google Workspace → Gmail → User settings → Mail delegation, and allow delegates. (Alternative: create a Google-side user such as automation@ in admin.google.com and add that as the delegate — note this is separate from the Microsoft user in item 2, as your email runs on Google and your files on Microsoft.)

Step 3. The previously shared password should then be changed — the delegate access replaces it.

Priority 2 — Unlocks the enquiry hub (this week or next)

☐ 4. Meta Business Manager — 5 minutes

business.facebook.com → Business Settings → People → Add → enter sharry00010@gmail.com → role: Employee access → then under “Assign assets”, tick your Facebook Page, Instagram account, and the WhatsApp account → Invite.

☐ 5. WhatsApp Business — status check (already started) — 1 minute

Reply with: (a) business verification status (pending / approved), and (b) the phone number you chose for the automation.

☐ 6. Website enquiries — 1 answer — 1 minute

Where do your website contact-form messages currently go? (an email address, or a plugin name). Just reply with the answer.

Priority 3 — Unlocks the connections & AI

☐ 7. Make.com account (the “connector” platform) — 5 minutes

Step 1. Go to make.com → Sign up using your business email (this keeps ownership with Yale Migration; the subscription is a pass-through cost as per the Proposal).

Step 2. After signup: Team → Invite user → sharry00010@gmail.com (Admin role).

☐ 8. Claude AI key (for the email sorting) — 10 minutes

Step 1. Go to console.anthropic.com → sign up with your business email.

Step 2. Add a payment method under Billing (usage is small — email sorting at your volume costs only a few dollars per month, and it runs on YOUR account as agreed in the Engagement Letter).

Step 3. Go to API Keys → Create Key → name it “yale-automation”.

Step 4. Send the key by a private channel (not group chat) — or simply enter it together with us on the kick-off call, which is easiest.

Priority 4 — Materials (no technical steps)

☐ 9. Sample emails — sent AND received — 8 minutes

Two small bundles: (a) five to ten replies your team has sent — including at least one email where you request documents from a client (these teach the AI your tone), and (b) three to five examples of emails you RECEIVE — a typical new enquiry, a client sending documents, an accounts email, and most importantly one example of a Department Section 56 / request-for-information email from any past client file (names can be blacked out) — this trains the urgent-alert feature.

☐ 10. Follow-up templates from the Inquiry SOP — 1 minute

Your Follow-up Email and Follow-up SMS templates, if they exist as files.

☐ 11. Team roster — 5 minutes

Each team member's name, email, and which visa types / email categories they handle (a simple list or photo of a list is fine).

☐ 12. Internal forms — 2 minutes

Copies of your Client Inquiry Form, Detail Form, and Initial Consultation Form (any that exist as files) — our intake form must mirror the fields your team already uses.

☐ 13. Enquiry conversation samples — 3 minutes

Two or three screenshots of typical enquiry conversations on WhatsApp or Facebook — a client asking, and how your team replies — so the auto-replies sound exactly like your team.

☐ 14. Checklist confirmation — 1 minute

One reply confirming the checklist documents you have sent us (across all three batches) are the current versions your team uses today — so the automation never sends a client an outdated list.

Not needed yet

Xero access, the fee-review call, and calendar access are only needed in Phase 2 — we will ask for them then, not now.

One-page summary — print and tick off

This is the same list, boiled down. Print it, hand it to whoever's helping, and tick as you go. If anything is unclear, message me and we'll knock it out on a quick call.

#	Item	Who at Yale	Est. time	Done ☐
1	Client Engagement Log (Google Sheets)	Owner	1 min	☐
2	Microsoft 365 / OneDrive — create Automation user + share folders	Owner / IT admin	10 min	☐
3	Email inbox — 2-Step + delegate access	Owner	5 min	☐
4	Meta Business Manager — invite consultant + assign assets	Owner	5 min	☐
5	WhatsApp Business — status + number	Owner	1 min	☐
6	Website enquiries — where they land today	Owner	1 min	☐
7	Make.com account — sign up + invite consultant	Owner	5 min	☐
8	Claude AI key — create + share privately	Owner	10 min	☐
9	Sample emails — sent AND received	Team lead	8 min	☐
10	Follow-up Email / SMS templates	Team lead	1 min	☐
11	Team roster (name, email, visa / email categories)	Owner	5 min	☐
12	Internal forms (Inquiry Form, Detail Form, Consultation Form)	Team lead	2 min	☐
13	Enquiry conversation screenshots (WhatsApp/Facebook)	Team lead	3 min	☐
14	Checklist confirmation — current versions	Owner	1 min	☐

Once Priority 1 is done, message me and I'll confirm the first-week build kicks off the same day.
